

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

STATE OF INDIANA.

FIFTH ANNUAL REPORT

OF THE

DEPARTMENT OF INSPECTION

OF

119025

MANUFACTURING AND MERCANTILE ESTABLISHMENTS, LAUNDRIES,
BAKERIES, QUARRIES, PRINTING OFFICES
AND PUBLIC BUILDINGS.

TO THE GOVERNOR.

1901.

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.
1902.

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
December 18, 1901. }

Received by the Governor, examined and referred to the Auditor of State
for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, January 3, 1902. }

The within report, so far as the same relates to moneys drawn from the State
Treasury, has been examined and found correct.

W. H. HART,
Auditor of State.

JANUARY 4, 1902.

Returned by the Auditor of State, with above certificate, and transmitted to
Secretary of State for publication, upon the order of the Board of Commissioners
of Public Printing and Binding.

CHAS. E. WILSON,
Private Secretary.

Filed in the office of the Secretary of State of the State of Indiana, January
4, 1902.

UNION B. HUNT,
Secretary of State.

Received the within report and delivered to the printer this 4th day of
January, 1902.

THOS. J. CARTER,
Clerk Printing Bureau.

OFFICIAL LIST.

STATE OF INDIANA.

FIFTH ANNUAL REPORT

OF THE

DEPARTMENT OF INSPECTION.

Hon. Winfield T. Durbin, Governor of Indiana :

Sir—In compliance with section 21, chapter 142, Law of 1899, I herewith submit to you the fifth annual report of this Department, which applies to the manufacturing and mercantile establishments, quarries, laundries, renovating works, bakeries and printing offices of the State, as well as the enforcement of the fire escape law.

The Legislature of 1901, recognizing the importance of the proper enforcement of labor and factory laws, and that the number of deputies was insufficient for that purpose, increased the number from two to five, thereby enabling us to divide the State into districts, assigning a deputy to each one. This, we believe, will enable them to become familiar with the different establishments and will also permit them to look after accidents more promptly and have a general oversight of their territory.

In accordance with the provisions of the law the following names were presented to you for confirmation as deputies: David F. Spees, of Vincennes, to be Chief Deputy; James H. Roberts, of South Bend; J. H. Clarke, of Indianapolis, and Thomas S. Williamson, of Anderson. These, with Harvey A. Richards, of Muncie, who was appointed in May of 1899, give the Department a force which will amply repay the State for its outlay, by improving the conditions, reducing the number of accidents on dangerous ma-

chinery, lessening the number of damage suits against proprietors, as well as making better citizens of those employed under improved moral and sanitary conditions.

That the report may not be voluminous we have condensed as much as we deem practical, yet we have tried to give all the useful information that pertains to the manufacturing establishments without encroaching on the duties of the State Statistician. The orders issued by the Department number 1,494. Previous reports have contained these orders in detail. Owing to their similarity we give only a few at this time (see Exhibit C), and as they cover all phases of our duties it can be seen with what care the deputies have attended to their duties.

CONDITIONS.

The wave of prosperity, which was first felt in the fall of 1897, has continued with unabated force until not only have the unemployed found employment at remunerative wages, but it has caused an actual dearth of mechanics and laborers in nearly all the trades. This is more noticeable in the window-glass houses and among that class of ironworkers where the old process of iron, known as "puddling," is still in vogue. Puddlers are at a premium; consequently, they are receiving the highest compensation ever received for this kind of work. Furniture manufacturers are employing all who ask for work. Manufacturers of workingmen's garments are crowded with orders and sufficient help can not be had to operate the machines now in position. The same conditions exist in all parts of the State. Common laborers do not have to tramp in search of employment.

BAKESHOPS AND FOOD-PRODUCING ESTABLISHMENTS.

The law passed by the last General Assembly, giving this Department an oversight of bakeshops, confectioneries, and all food-producing establishments, is being met with in the very best spirit. A ready compliance with its provisions is manifested, even where opposition might have been expected. The general public little realizes the importance of this measure when properly enforced.

EMPLOYMENT OF MINORS.

Some few complaints have been received during the year relative to the employment of children under fourteen years of age. Most of these were made by persons who had not carefully read the law, and when investigated by us few violations were found. We have, however, had to bring suit against the following firms for flagrant violations of the law: Thompson Bottle Company, Gas City, January 19, 1901, \$12.40; Fairmount Glass Works, Fairmount, January 19, 1901, \$13.85; Swayzee Glass Company, Swayzee, January 19, 1901, \$13.50; Winslow Glass Company, Matthews, January 19, 1901, \$20.65; The Sans Pareil Bottle Company, Hartford City, February 4, 1901, \$10.95; Hartford City Flint Glass Company, Hartford City, February 5, 1901, \$10.40; Maring, Hart & Company, Dunkirk, February 7, 1901, \$11.65; Beatty-Brady Glass Company, Dunkirk, February 7, 1901, \$11.60; Marietta Glass Company, Redkey, February 2, 1901, \$9.95; The Lapel Flint Glass Company, two cases and second time, February 15, 1901, \$26.80; The Lapel Bottle Company, second time, February 15, 1901, \$13.40; The Sans Pareil Bottle Company, two cases and second time, May 29, 1901, \$22.90; and Mr. Henry Criminel, of the Sneath Glass Company, Hartford City, May 29, 1901, \$11.95.

They are all in the glass business where boys are scarce. The violations were so plain that they all pleaded guilty and were fined the amounts stated. Outside of glass works little trouble is encountered, now that we have the department stores living up to the requirements of the law. This Department has been repeatedly solicited by the mothers of those under fourteen years of age for permission for their children to work. Many of them were very persistent in their solicitations, as they could not understand why the State would not allow their children to work when they were their only support.

In order to meet these conditions the State of Ohio changed the working age for boys to fifteen and that of girls to sixteen during the school term, and thirteen for either sex while vacations of schools lasted. After a fair trial of several years, Hon. J. W. Knaub, Chief Inspector, in his report for 1900, recommends just such a law as we now have, "a uniform minimum age at which

minors may be employed in shops and factories, for both sexes, applicable throughout the entire year."

ILLITERATES.

The number of illiterate children reported at work in the factories is surprisingly few. This question is asked of all manufacturers, and their answers are reported to this office. They are so few (not more than a dozen) in the entire State that we can scarcely credit the report. We can say this, however, that what few there are, ninety per cent. are from States south of us—Kentucky, Tennessee and North Carolina—who have moved within our borders. The number of native children between fourteen and sixteen in our factories, who can not read and write, is only a small fraction of even this small number.

FIRE ESCAPES.

That the outside open fire escape is all that is necessary to make a building safe has been disproved very recently in one of the eastern cities, where a number of the inmates were burned to death in plain view of the public. Our present escape is a very practical one when the building is not more than four stories in height, but where they extend upward more than this they are not as safe as could be desired.

The era of high buildings is at hand, and while these are what are termed "fire proof" buildings, yet the contents of almost any of them are of such a character that when fairly ignited would create smoke sufficient to suffocate the occupants, and heat enough to endanger the entire structure. However, on account of its fire-proof qualities, little attention is given to the means of egress, except by elevators and a too narrow stairway placed so close together that if one should be cut off by smoke or fire the other could not be used for the same reason. On all buildings more than five stories in height, occupied by so many persons, there should be at least two brick enclosed stairways accessible only from the outside by means of balconies at each floor.

Further than this we can only refer you to our recommendations of last year.

BOILER EXPLOSIONS.

This year the number of deaths caused by boiler explosions has been below the average—only one death and six explosions. In our last report we had nine fatalities, caused by seven explosions. The conditions, as found by the deputies, do not cause us to expect this average to continue for any great length of time. With boilers situated in the basements of buildings occupied by many persons, with nothing to show the condition of the boiler, or the competency of the engineer, except his own verbal statement, it is only a question of time until we will have such a horror as will cause our lawmakers to compel all owners of boilers to take the same precautions that are now taken, voluntarily, by many.

Such a measure was presented to the last General Assembly, and in our judgment should have become a law, but was defeated by means of a petition presented by the gas and oil well drillers and oil pumpers, who are mostly “birds of passage,” and prefer to take their chances in case of an explosion.

Reports have been made to this office, by the deputies, of safety valves being weighted down with car links and other weights than the regular P, and quite a number without try-cocks, depending on a water-glass with defective connections. These conditions can only be remedied by a specific law bearing on the subject, embracing the following points, which we suggested in our last report: First, the seller of a second-hand boiler should be compelled by law to furnish the purchaser a certificate of condition, signed by a practical boilermaker after a thorough examination, stating the actual condition and working pressure that could safely be carried; second, all operators of steam boilers carrying more than twenty pounds of steam, should be required to keep on file in this office a certificate of inspection made by a practical boilermaker, this certificate of inspection to be renewed yearly, or oftener, if, in the judgment of the Department, it is thought necessary; third, making it a finable offense to operate a boiler of the above description without the following devices: a steam gauge, a safety valve, water gauges and a water column, all to be kept in first-class condition, as well as a fusible plug in all internally fired boilers.

GUARDING DANGEROUS MACHINERY.

It is frequently the case, after some one has been hurt, to hear the manager or proprietor say that he would not have had the accident occur for a much larger sum than would have provided all of his machinery with safety devices, and thus, possibly, have prevented the accident. This Department believes the better way is to take the precaution as soon as the danger is discovered. We have been insisting on the law being obeyed and are meeting with little opposition. In a few instances proprietors have waited until after an accident has occurred before complying with our orders. The practicability of many of these safety devices has been demonstrated by many establishments using them. The claim that they can not be used is not accepted by this Department. The accidents this year are of such a character that we can not help but feel that our efforts have lessened the number of those occurring on dangerous machines.

In complying with the orders of this Department the employer is not only protecting the workmen from accidents, but himself from suits for damages, as well as the payment of wages to employes while injured.

The decisions of the courts are such that they work a hardship on those who are employed around saws, planers, jointers, and other dangerous machines. Their decisions and instructions to juries are, that if a man continues at work on a machine which he considers dangerous, that he is guilty of contributory negligence, and can therefore secure no damages. He may have reported the dangerous machine to the foreman, and asked permission to stop and have it placed in order. If permission is withheld, which is frequently the case, his only recourse is to refuse to operate it, which means he must go elsewhere for work. This is a matter of very great moment to many who have families dependent upon them, and who are possibly paying for a home, when every day counts. The loss of time looking for employment elsewhere, even when men are scarce as they now are, would mean a sacrifice of some kind. In the smaller places the chances are he would have to go to an adjoining town. Rather than do either of these he continues at work against his better judgment; the loss or mutilation of hands or fingers is the result.

It does appear to me that when an operator of any machine notifies his foreman, or when the employer fails to obey the orders to place safety devices on certain machines, that that should be prima facie evidence of neglect on their part and make them liable for damages.

THE WEEKLY WAGE LAW.

There is nothing new with reference to this law. We have been unable to have any of the suits, brought by us against some of the larger corporations, reach the Supreme Court, where we hope to have a final decision in our favor as to the constitutionality of the law. The law is very generally observed, except, perhaps a few of the stone quarries, who are still paying monthly, having an agreement with their men to that effect.

SANITARY CONDITIONS.

While many of our factories are not just what we would like to have them, yet the conditions have improved so greatly that we feel to force these improvements beyond the education of both employer and employed would be a detriment to all concerned. So we have endeavored to cultivate a spirit of emulation, and we find that just as soon as one establishment improves their conditions, their neighbors, as well as their competitors, adopt these improvements, and others that have proved to be practical. There is a continual improvement apparent all over the State. This, perhaps, is more marked where the larger part of the employes are females, who apparently take more kindly to these betterments.

We sincerely hope that the time is not far distant when all those places where the workmen become dust and soot begrimed shall be provided with bath and other facilities for their employes so they may be seen on the streets on the way home appearing and feeling like American citizens. This would have as beneficial effect on many men as does the clean linen and china on the tables in the dining-rooms where women are employed, who carry the idea of a tastily arranged table home with them; possibly this being their first lesson in this line. The moral effect is well worth the trial, especially since those who have tried these methods claim that it pays in dollars and cents.

Number of inspections made by D. F. Spees, Chief Deputy.	555	945
Number of inspections made by H. A. Richards, Deputy Inspector	749	817

	1901.	1900.
Number of inspections made by J. H. Clarke, Deputy Inspector	357
Number of inspections made by Thomas S. Williamson, Deputy Inspector	471
Number of inspections made by J. H. Roberts, Deputy Inspector	330
Total number employed	151,799	130,240
Total number of males employed.....	131,215	112,430
Total number of females employed.....	20,504	17,810
Total number of males under the age of sixteen years.....	2,634	2,058
Total number of females under the age of sixteen years...	784	558
Number of orders issued.....	1,494	1,154
Buildings on which fire escapes were ordered.....	72	137
Number of escapes inspected and accepted.....	58	79
Number of accidents reported to this office, more than slight	382	507
Number of accidents reported to this office, slight.....	290	109
Number of fatal accidents, boiler explosions.....	1	9
Number of fatal accidents, saws.....	3	4
Number of fatal accidents, shafting.....	6	4
Number of fatal accidents, miscellaneous.....	29	17
The burial and medical expenses were.....	\$19 31	total, \$7,376 42
Benefits received from other sources.....	14 09	total, 5,832 38
<hr/>		
Total money loss.....	\$67 97	total, \$26,414 54

Of the fatal accidents, 12.8 per cent. were under twenty years of age; 41 per cent. were between twenty and thirty; 20.5 per cent. were between thirty and forty; 18 per cent. were between forty and fifty; 7.7 per cent. were past fifty.

ACCIDENTS.

The accidents reported to this Department for the year numbered six hundred and seventy-two. Two hundred and ninety (290) of this number were of such a character that they did not cause a loss of one week's time; consequently, no further attention has been paid to them. Of the other three hundred and eighty-two

39 were fatal.

56 were caused by carelessness.

104 occurred where there were no machines.

13 were caused by unguarded machinery.

48 were caused by saws.

12 were caused by shafting.

15 were caused by belts and pulleys.

- 11 were caused by elevators.
- 3 eyes were lost.
- 2 arms were amputated.
- 5 hands were amputated.
- 71 fingers were amputated.
- 8 toes were amputated.

Of these three hundred and eighty-two we received a detailed statement from three hundred and fifteen, from which the following is deduced:

Each accident caused the loss of twenty-two days.

The employes lost in wages, \$24.62; total, \$9,404.84.

The employers paid wages during disability, \$9.95; total, \$3,800.90.

	1901.	1900.
Total number of fatal accidents.....	39	34
Number of accidents to those under the age of sixteen years	21	27
Capacity of steam boilers, horse power.....	249,254	230,842
Horse power of engines.....	206,514	177,017
Horse power of gas and gasoline engines.....	8,240	250
Horse power of electric motors.....	2,835	700
Horse power of water.....	5,033	850
Total	222,622	181,067

I desire to express my appreciation of the services of the deputies who have so faithfully discharged their duties, which demands such a general knowledge of so many subjects that it requires faithful effort to be able to intelligently make the proper recommendations under so many different conditions for the protection of the employes without subjecting the proprietors to undue expense or trouble, all of which they have admirably succeeded in doing.

To the manufacturers who have obeyed our orders and so promptly reported the accidents at the time of occurrence, and subsequently filled out for us the supplemental blanks, enabling us to show the cost of accidents occurring on unguarded machines, as well as those caused by carelessness, loss of wages, etc., the thanks of the Department is hereby tendered, sincerely trusting that our efforts on behalf of both employer and employed are duly appreciated. I am, yours very truly,

DANIEL H. McABEE,
Chief Inspector.

EXHIBIT C.

Selections from the 1,494 Orders Made

BY THE

DEPARTMENT OF INSPECTION.

Showing the lines along which the Department is working, as well as the many phases of knowledge necessary for the proper discharge of the duties. These orders are revised, corrected, and mailed by the Chief Inspector on blanks prepared for that purpose from the office, 91 State House, where all communications with reference to same should be addressed.

EXHIBIT C.

*Selections from the 1,494 Orders Made by the Department
of Inspection.*

- June 4. Place guards on rip and edging saws and hood on swinging cut-off saw; cover or countersink all protruding set-screws in collars and hubs of pulley wheels; provide three new try-cocks on boiler, and post laws.
- June 4. Provide rubber matting for floor in front of switchboard and handrails on all overhead walks; cover or countersink all protruding set-screws in collars and hubs of pulley wheels; place guard on rip saw.
- Nov. 27. Place straps around the timbers on which telegraph is hung, the straps to go under this timber and over the girders; keep the pans on the ends of boshes.
- June 3. Place railings around all shears; cover or countersink all protruding set-screws in collars and hubs of pulley wheels; provide a new water-closet for puddle department; secure affidavits from all minors between the ages of 14 and 16 years, and keep them on file; cover squeezers more securely to prevent men from injury by explosions, and post laws.
- Sept. 11. Cover or countersink all protruding set-screws on shafting; cover bolts projecting out from couplings; cover holes in floor on second story; place guard around belt as it comes through floor on the apple crusher; have boiler inspected and send certificate of inspection to this office; post laws.
- Dec. 12. Place guard on jointer; cover cogs on planer; repair drain pipes to men's water-closet; post laws.
- Dec. 8. Secure affidavits from all minors between the ages of 14 and 16 years and keep them on file; employ no children between these ages during school term who can not read and write simple sentences in the English language; discharge all minors under the age of 14 years; and erect handrail along incline walk over engine from work room into engine room.
- June 20. Provide new try-cocks for boiler; box up line shafting and pulleys under swing machines; fill out all blanks and post laws.
- Aug. 27. Provide dressing room for girls; place railing around or cover shafting at rounder and axle cap fitting machines; connect all sanders with blower; repair try-cocks on boiler and keep them in good working order; post laws.
- May 6. Pay in accordance with the weekly wage law, which requires that weekly payments be made. It is absolutely necessary that you establish a regular pay-day.

- July 16. Grease elevator cables.
- Aug. 7. Provide seven more seats in water-closet for girls and six more for men; cover or countersink all set-screws; cover shafting and pulleys under swing machines; secure affidavits from all minors between the ages of 14 and 16 years; fill out and post register of young people in rooms where employed, and keep copy of them in office as law directs.
- July 22. Provide rubber mats for switchboard, and cover or countersink the remaining protruding set-screws.
- Oct. 25. Employ no children under 14 years of age; secure affidavits from parents or guardians for minors between the ages of 14 and 16 years and keep them on file in your office; permit no young person under the age of 18 years to operate your elevator; provide some means of exit from front end of basement in the event of fire or smoke in rear which would prevent escape by way of stairway or Pearl-street sidewalk.
- Sept. 25. Provide some better safeguard around your boiling vats than you now have, so a workman in the removal and filling process may have some means of protection; accidents that are frequent and so easily possible around boiling vats must be guarded against; extend the walls of vat 14 to 18 inches above ground, or by providing fall-arms, as suggested by Deputy Inspector, or other means; provide guards for rip saws and place shield before exposed set-screw in collar to floor pulley, second floor.
- Sept. 13. Provide a dressing room, ample and sufficient, for women and girls employed, and water closet accommodations equal to the requirements (one seat to every twenty-five employes), and post laws.
- Nov. 5. Do not use bolts on door at foot of stairs in the day-time when employes are at work, but keep doors closed by means of springs; remove scrap boxes at head of stairs on second floor; keep passageway to bridge unobstructed; place oil cans in a metal box with cover and find other location for them away from stairs; see that work boxes are kept out of aisles as much as possible.
- Mar. 27. Provide better ventilation in smith shop; a large central vent in roof, or the extension of present smoke flues direct up through roof, is recommended.
- Jan. 11. Provide one water-closet for ladies; clean and repair and, if possible, remove from present location the closet used by men; provide better light, heat, and especially better ventilation in press room, local room and linotype room, second floor; make safe any insecure places in floors, floor openings, wall defects; renovate floors, side walls and ceiling in first and second story; fill up any unused or open pools or vaults in cellar and lime-wash all cellar walls and ceilings with not less than three coats of wash; abandon use of open lights and fires.
- Oct. 2. Provide one additional water-closet in building No. 523 East Washington Street, occupied by Climax Coffee and Baking

- Powder Company. This closet must be separate and apart from present closet and with separate approach; inclose sides of elevator shaft with firm, substantial sides or railing.
- Sept. 10. Provide top outward-tipping window screens in the spring; provide cuspidors for bakeshop; lime-wash or paint all walls and ceilings; scrub all woodwork and floors and keep them in a good condition; post law and expectorating notices.
- Aug. 20. Remove flour from basement and keep it in a dry place; provide cuspidor for bakeshop; keep floor in a clean condition; post laws and notices.
- Aug. 20. Open small window in east end of bakeshop that opens out on the sidewalk, to give better ventilation in shop.
- June 17. Repair plastering on ceiling and wall; provide castors for dough troughs; repair springs on screen doors; provide top outward-tipping screens for windows; remove wash-sink from bake-room; scrub all floors; provide cuspidors and post law and expectorating notices.
- June 19. Place two fire escapes on Bucklin Hotel; one escape embracing south window at east side of south end, fourth floor, landing on one-story roof below; the other escape to take in window now occupied by straight ladder escape at east end of main building, with balconies at fourth, third, second, and within twelve feet of ground, with drop ladder to ground. Glass in doors of rooms leading to escapes should be plainly marked, "This way to escape;" place red light at head of stairs and intersection of stairways; keep watchman on duty all night; post notices in each sleeping room with directions how to reach fire escapes.
- July 24. Keep the door and passageway from the ante-room of K. of P. Hall free from obstruction, so the door may be opened at any time, thus saving you the trouble and expense of putting a fire escape on the outside of the building.
- July 24. Provide additional exits from Irwin Opera House on each side of gallery, about midway between front and rear, with proper stairs to ground, or place a stairway in lobby opposite the present main stairs on second floor; this stairs either on inside or outside of building.
- May 22. Place fire escape on Industrial School for Girls and Woman's Prison, taking in middle window, third floor, south end, east side of west wing, with balconies, stairs and drop ladder to ground; have drop ladder of escape on west end of building telescoped; dryer in laundry should be covered over, leaving air space between top and ceiling; thus making rooms above more tenable and lessening the danger of fire; place a watchwoman on each floor above the first, with keys to all rooms and fire escapes, and a watchman on first floor and basement; replace wooden chute into laundry with one of metal construction, with trap door at lower end, which should always be closed, except when open for discharge of clothes; fire or

smoke stops should be placed in halls near stair landings; these need not be locked, but should be closed at night; abandon the attic or fourth floor for sleeping places.

- Jan. 5. Locate one fire escape on east or alley end of Chase Block, placing upper balcony on level with third floor, and embracing either first or fourth window from Ferry-street front, lower balcony on level with second floor and embracing window at end of hall with drop ladder from balcony at second floor to ground; also, locate a like escape on southwest corner of same building, upper balcony embracing window next to corner on either Fourth or Ferry-street side, etc.
